ACADEMY OF HIGHER EDUCATION

## About us

In international terms, Dania Academy of Higher Education is a university of applied sciences, and our programmes include applied degrees in the fields of technology, IT, business and health. Out of our 21 programmes, 5 are taught entirely in English at our two largest campuses, Randers and Viborg.

Dania is one of nine regional academies in Denmark. Our campuses are located in eight cities across the Central Denmark Region: Randers, Viborg, Grenaa, Hadsten, Hobro, Horsens, Skive and Silkeborg.

At Dania, we develop and offer practice-oriented higher-education programmes at undergraduate level (AP and BA degrees).

Our courses combine theory and practice, and students actively take part in classroom sessions and receive tutoring in small groups during project work. We cultivate our strong ties with relevant local industries, and real-life cases and internships are an important part of our programmes.

With a staff of 155 and 2500 full-time students, 320 of whom are international, as well as many part-time students, we play an important role in Denmark's higher-education sector.

On 1 January 2009, Dania Academy of Higher Education became a reality, as the result of a merger incorporating 7 independent academies.

# Facts

## Location

- The Central Denmark
- Region, Jutland

## Fields of education

- Business
- Tourism & Hospitality
- IT & Game development
- Technology
- Health
- Tailor-made courses for business and industry

## Programmes

- 21 degree programmes (5 taught in English)

## Students

- 2500 (320 international)

## Faculty and other staff

- 155

## Research, development and incubator centres

- Danish Research Centre for Tourism and Experiences
- Institute for Danish Game Development
- Danish Institute of Retail
- The Ranch (incubator centre)
- Optometry Programme Research

## Accreditation

Dania is a publicly recognised, state-financed institution of higher education, regulated by

the Ministry of Higher Education and Science. As part of the Bologna Process, Dania and all other institutions in the Danish HE sector have implemented the European Standards and Guidelines for the quality assurance of higher educations (ESG) – international quality and relevance standards that all public higher-education study programmes must meet.

Dania holds an Erasmus+ charter and is a member of EAIE, Businet and EuroCHRIE.

# Internationalisation

## Erasmus+ and other exchange opportunities

We welcome exchange students in all of our programmes, but students who choose a Danish-taught programme must have a good command of Danish. Dania's own students are encouraged to go abroad for one semester of study and for their internship.

For further information, please contact Head of International Mobility, Flemming K. Andersen, at [fka@eadania.dk](mailto:fka@eadania.dk).

## Erasmus+ Strategic Partnerships & other EU projects

### InnoGuide 2.0

Along with partners from Belgium, the Netherlands, Finland and Croatia, Dania is participating in the Erasmus+ Strategic Partnership project InnoGuide 2.0.

This project aims to develop an online platform for train-the-trainer modules and workshops designed to educate guide trainers. At the same time, the partnership is developing a self-evaluation tool for guide organisations to help them assess their level of sustainability.

### GameBiz

As part of the Erasmus+ programme, Dania is a core partner in the project GameBiz, working alongside university partners from the Netherlands, UK, Malta and Spain as well as one of Europe's leading game incubators, Dutch Game Garden.

GameBiz focuses on knowledge transfer, and its main purpose is to develop a model to create and support incubation environments for the gaming industry.

This model will also be integrated into the curricula of the participating institutions and, eventually, at other educational institutions.

### Game Hub Scandinavia

Game Hub Scandinavia is an EU project under the Interreg programme.

It is designed to support and strengthen existing game incubation environments and to promote cross-border networks between game incubators and educations in the Scandinavian region over the next 4 years.

Besides Dania, the project consortium consists of 7 very diverse partners from Denmark, Norway and Sweden.

# Programmes

## Danish-taught Undergraduate Programmes

### Business

- Administrative Management
- Commerce Management
- Financial Management
- Logistics Management
- Marketing Management
- Hospitality and Tourism Management

### Technology

- Service Engineering
- Automation Engineering
- Energy Technology
- Automotive Technology
- Production Technology

### IT

- Computer Science, incl. Game Development
- Multimedia Design & Communication
- IT Technology

### Health

- Optometry

## English-taught Undergraduate Programmes

- Marketing Management
- Hospitality and Tourism Management
- International Hospitality Management
- Automotive Technology
- IT Technology

# About Denmark

- A small Scandinavian country in northern Europe (42,916 km<sup>2</sup>)
- Population: 5.6 million (2014)
- The capital is Copenhagen (1.2 million)
